

Geography – Wednesday 20th January 2021

Last week we were surprised to find out that all of these pictures were taken in Africa!

Can you sort the same photos into two different categories – one for physical features and one for human features.

We can recap human and physical features here → <https://www.bbc.co.uk/bitesize/topics/zqj3n9q/articles/zr8q7nb>

Physical features are aspects of the landscape that are naturally there, such as seas, mountains and rivers.

Human features are aspects of the landscape that have been built or created by people.
