

Fractions of Amounts

Model

$$1/10 \text{ of } 30 = \underline{\quad}$$

| | | | | | | | | | |
|-----------|------|------|------|------|------|------|------|------|------|
| 30 | | | | | | | | | |
| | | | | | | | | | |
| 1/10 | 1/10 | 1/10 | 1/10 | 1/10 | 1/10 | 1/10 | 1/10 | 1/10 | 1/10 |

Model

$1/10$ of 50

| | | | | | | | | | |
|-----------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| 50 | | | | | | | | | |
| | | | | | | | | | |
| $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ |

Model

$1/10$ of 70

| | | | | | | | | | |
|-----------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| 70 | | | | | | | | | |
| | | | | | | | | | |
| $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ | $1/10$ |

Why has the bar model stayed the same?

What is $3/10$ of 70?

Task

1. $80 \div 10$
2. $60 \div 10$
3. $70 \div 10$

Using a bar model, find....

4. $\frac{1}{10}$ of 80
5. $\frac{2}{10}$ of 60
6. $\frac{7}{10}$ of 70

If Alexandra doubled her counters, what fraction would that show?

Could you represent that using a decimal?

Remember to use the bar model to help you.

7. Stephen is using a ten frame and counters to represent tenths.

This shows $\frac{2}{10}$.

Is he correct? Explain your answer.

8. Alexandra is using a ten frame and ten counters.

I want to show four tenths. I will have six counters that I won't use.

Is she correct? Explain your answer.
